

A25 M Tube amplifier + AVP-01 Phono pre-amplifier

**A25 M amplifier (2x25W)
AVP-01 MC Input impedance, switched:
100, 200, 470, 1000 ohm
Head Phone 'In', Output Level control**

A25 M amplifier is an excellent demonstration of compromise between audio reproduction quality. Produced with advanced technology, reproduces the signal of different sources, with high quality and resolution.

AVP-01 performs remarkably with high-end phono amplification systems, using an original sourced UGIP (U2P-08) tube and featuring the best electronic components. Two Outputs 'In' and 'Line' impedance, balanced or directly from 01 tube.

Tube: 6SL7, 6L34C, 6X4MB "Tungsol"
1981 Made in USSR
Best adjustment system

Industrial Precision Production / CE
